SUMMARY

Android Developer with 2+ years of experience building and maintaining consumer apps in Kotlin and Jetpack Compose. Contributed to AI-powered products reaching millions of users, with a focus on clean architecture (MVI/MVVM), application performance, and reliable, maintainable code. Passionate about continuous learning and committed to high standards, with strong attention to detail in every product I ship.

PROFESSIONAL EXPERIENCE

Mellon Software

Android Developer

02/2024 – 06/2026

İstanbul, Ataşehir

Mellon Software is a software company building AI-powered consumer applications across Android, iOS, and web, spanning media, productivity, and creativity, with products reaching millions of users worldwide. Developed and maintained production-scale Android apps using Kotlin, Jetpack Compose, and MVI/MVVM architecture.

- **Videa (2M+ users · 45K+ reviews):** A feature-rich AI app for generating videos and images. Built and maintained core Android features with Jetpack Compose and MVI architecture, contributing to a highly rated, large-scale product.
- **Lisa AI: AI Art Generator (1M+ downloads):** Built core Android features for a large-scale AI image and avatar generation app using XML and MVVM.
- **Robo AI – Chat & Ask AI Chatbot (500K+ downloads):** An AI chatbot assistant offering AI chat and ready-made prompt templates. Initially built with XML and MVVM, then fully redesigned and rebuilt from scratch with Jetpack Compose.
- **AI Photo Enhancer & Restore (50K+ downloads):** An AI photo enhancement and restoration app that unblurs, repairs, and upscales old or damaged photos to HD quality.
- **Lingo AI Translator:** A subscription-based AI translation app built with Jetpack Compose, featuring text translation, a phrasebook, camera translation, and an AI chatbot interface.

Arçelik

IT Intern (High School Internship)

09/2019 – 06/2020

Çayırova, Kocaeli
